

Shaylen Van Pelt

shayvanpelt05@gmail.com | (250) 507 - 8318 | github.com/ShayVanPelt | shayvanpelt.com

EDUCATION

Bachelor of Software Engineering

University of Victoria

Aug 2026

Victoria, BC

WORK EXPERIENCE

Junior QA Analyst Co-op

Journal Technologies

06/2025 – 04/2026

Victoria, BC

- Performed regression, manual, and exploratory testing to identify defects and ensure product stability across releases
- Executed spot checks on production features and validated ticket requirements against expected behavior
- Developed and maintained integration tests using TypeScript to improve test coverage and reliability
- Implemented production-ready features in TypeScript, contributing to core application functionality
- Automated repetitive QA spot checks using Java and Selenium, reducing execution time from 15 minutes to 5 minutes (~66% improvement)
- Collaborated closely with QA and development teams to reproduce bugs, validate fixes, and ensure timely resolution of issues
- Wrote detailed test cases and documentation, improving clarity and consistency in testing processes
- Analyzed test results and created clear, actionable bug reports to support efficient debugging

Full Stack Software Developer Co-op

Certispec Services Inc.

01/2025 – 04/2025

Vancouver, BC

- Designed responsive front-end user interfaces with Next.js
- Managed application states using Zustand, hooks and local states
- Optimized API endpoints through implementation of pagination for large datasets
- Developed complex queries for PostgreSQL databases, leveraging JSONB for efficient data storage
- Developed and secured REST API endpoints using OAuth token handling and validation
- Resolved bugs, implemented front-end components, and developed backend features to complete project tickets efficiently

Software Developer Co-op (Python)

University of Victoria, Department of Civil Engineering

09/2021 – 12/2021

Victoria, BC

- Created dashboards that display information for graduate students using Dash and React.
- Used Git version control software to deal with merge conflicts
- Created an API that downloaded zips with all data relating to technical information for each country or province on the University of Victoria website

TECHNICAL COMPETENCIES

LANGUAGES: C, C#, Python, Java, React/Next.js, TypeScript, PostgreSQL, SQLite.

TOOLS: TailwindCSS, Git version control, Agile, Docker, RESTful API, Zustand/Redux.

EMBEDDED: FreeRTOS, STM32 microprocessor.
OS: Windows, MacOS, Linux.

PROJECTS

Personal Website: Designed and developed a personal portfolio website (shayvanpelt.com) using Next.js and TailwindCSS. Implemented responsive design principles to ensure seamless performance across devices. Highlighted projects, skills, and professional experience, emphasizing modern web development practices.

DeepRacer: Developed and trained reinforcement learning models for AWS DeepRacer to optimize autonomous driving performance. Fine-tuned hyperparameters and analyzed reward functions to improve race times.
